SCOREBOARD PROTECTIVE NETTING Information Sheet

Carron Net scoreboard protective nets are made with the same tough, long lasting material as our baseball batting cage and backstop nets. Usually constructed of #77702 - black #21 nylon, 1 3/4" mesh, this netting is weather treated and UV stabilized for indoor or outdoor use.

Scoreboard nets are made to order with the size specified by the customer. As a rule of thumb, a scoreboard net is generally sized 1'-2' larger in each dimension than the scoreboard which it is intended to protect. They are typically constructed in one of the following ways. Please note that these examples are for illustration only. Mounting hardware is not provided by Carron Net.

Binding Only:

In this option, the net is constructed with tape binding on all edges into which grommets may be inserted at desired locations. Attachment method for this net is typically with clips, tie wraps or lacing cord to a framework in front of the scoreboard.

Vinyl Sleeves:

This option involves suspending the net from overhead using a pipe or rod through a sleeve to support the net. Vertical edges are tape bound. The bottom edge also has a sleeve into which a pipe or chain weight can be inserted for ballast.

Example of vinyl sleeve option:
